Take what's possible
& make it a reality.

Reduce development time.

Lower cost at commissioning and during normal operation.

Perform standard and safety control in the same chassis.

ALL OF THIS IS POSSIBLE.

The ControlLogix® starter kit is a discounted bundle of hardware and software that provides everything you need to get started. It's time to experience a truly integrated system, and we encourage you to build a kit that's right for you.

Contact your local sales representative or distributor for more information. We offer a standard kit and options to add redundancy as well.

Rockwell Automation

BASE KIT

CONTROLLER
- 1756-L8IE

COMMUNICATION
- 1756-EN2T

CHASSIS
- 1756-A7

POWER SUPPLY (select one)
- 1756-PA50
- 1756-PB50

DISCRETE INPUT MODULES (select one)
- 1756-IB16
- 1756-IA16

NOTE: You must select one removable terminal block for this module.

- 1756-TBNH (screw clamp)
- 1756-TBSH (spring clamp)

DISCRETE OUTPUT MODULES (select one)
- 1756-OB16E
- 1756-OA16

NOTE: You must select one removable terminal block for this module.

- 1756-TBNH (screw clamp)
- 1756-TBSH (spring clamp)

ANALOG MODULE (four inputs/two outputs)
- 1756-IF8I and 1756-OF8I

NOTE: You must select one removable terminal block for this module.

- 1756-TBCH (screw clamp)
- 1756-TBS6H (spring clamp)

SOFTWARE
- 9324C-RLDT31

NOTE: One-year annual subscription to Studio 5000® Professional
with Monday through Friday support from 8am-5pm EST.
